hayden**smith**

Front End Developer

statement

I'm an efficiency-minded front-end developer with a passion for *pixel-perfect* and high-quality code. I'm highly motivated to design and make products to be proud of and always look to develop my skills and keep up to date with *recent trends*.

I started developing a flash game for school, got an A and I was hooked, designing and developing websites for one the societies,Thanks to this I have proven experience in working on this kind of projects as a team and proven experience in HTML, CSS, Javascript and Bootstrap as well as converting basic HTML websites into WordPress.

personal skills

- Well organised and methodical approach to work.
- Able to analyse complex problems and assess possible solutions.
- Enthusiastic about improving and a developer.
- Always keeping up with recent trends.
- Ensures site made are efficiently coded and optimised

freelance work

2017   **The Test tube News**   Graphic and Web design

Started off creating website a PSD for comedy news web page,tailored to clients needs. Currently creating a HTML website out of an image in boot-strap. Will then import this all into Wordpress where the theme has lots of settings that can be altered.

2016   **Endeavour Gaming**   Website Developer and Wordpress Developer.

After Initially being given an HTML template, had to alter it significantly for the specific needs of client and then convert it so it can be used now as a full Wordpress theme with easy to alter theme settings
